

Envirotemp FR3 Fluid: Fluid Properties

This section provides developmental history and typical data on FR3 fluid. The following documents are included:

- IEEE PES T&D Conference Presentation May 2006: Natural Ester Dielectric Fluid Development. This presentation summarizes the development of FR3 Fluid
- CPS Product Information Bulletin B900-00092. This provides a listing of key typical properties
- CPS Report: Summary of tests conducted on Envirotemp FR3 Fluid, cross referenced to applicable test methods and standards
 - **Conclusion: Envirotemp FR3 Fluid is suitable as a dielectric fluid to be used in Power Transformers, and provides benefits not achievable with convention mineral oil.**
- CPS Envirotemp FR3 Fluid Testing Guide
- CPS Envirotemp FR3 Fluid Specification Guideline
