

CAN YOU FIND THE PDS MODULAR SUBSTATION?

If you can't it's because our PDS Modular Substations blend into any neighborhood. They are compact, low profile, require little space and you will save months of waiting time for installation because an entire PDS Modular Substation arrives at the same time, fits together, works together and installs quickly. And best of all it includes a reliable Waukesha Electric transformer.

To find out more, call our information hotline at 1.800.835.2732 and ask for our free brochures and product updates or ask to talk to one of our application engineers.
