

Middle of the day, main power transformer goes down... Are Your Spare and Mobile Transformers Ready for Active Duty?

CASE STUDY #1:

It's 5 p.m. on a hot summer day. Without warning, a manufacturing company's main transformer goes down, leaving them without sufficient power. Luckily, two spares are available. Company personnel test the first one before installation...and it FAILS. They then test the second spare, and it's also found to be unsuitable for service. Without a usable spare, overloading the remaining system components is their only short-run option.

CASE STUDY #2:

A natural disaster causes multiple transformer failures and widespread outages. The utility's contingency plan includes the installation of spare transformers. However, when they inspect their fleet, much of their equipment is missing parts or generally not service-ready. Deficient by at least five transformers, they are unable to return some circuits to service.

WAUKESHA SERVICE CAN HELP KEEP THESE SITUATIONS FROM HAPPENING TO YOU!

Our service team focuses on maintaining the performance quality and life of transformers and LTCs throughout your electric power system. We can work with you to increase system reliability by performing main, spare and mobile transformer condition assessments and maintenance of *all* manufacturers' transformers. Finding and fixing problems in your spare fleet BEFORE a main transformer failure occurs can increase customer satisfaction and spare transformer ROI while keeping your emergency restoration plan intact.

Our mission is simple: keep our customers' transformers up and running with responsive and cost-effective service, maintenance and engineering support 24/7/365.

WAUKESHA SERVICE CAPABILITIES INCLUDE

- Spare Transformer Fleet Management
- Condition Assessments
- Transformer Installation & Commissioning
- Transformer Relocation
- Transformer Dehumidification, Degassification & Reclamation
- FR3® Retrofills
- Regasketing, Field Repair & Maintenance
- LTC Inspection, Repair, Maintenance & Retrofits
- Electrical, Oil & Material Testing
- Thermal Uprate Studies
- Life Extension Services
